

Why can't I click on any of the cells on the Monthly Statistics worksheet?

This worksheet has been protected to ensure that the tables, graphs and formulas are not accidentally moved or broken. Unlike the Incident Data worksheet, the Monthly Statistics worksheet is not *password* protected and you can unlock it at any time. To do so, simply click on 'Unprotect Sheet' under the Review tab. (We highly suggest that you click 'Protect Sheet' after making the changes you want.)
